# Amazon

## Overview

This document will guide you through setting up Amazon Courier integration for **Voila**. Follow these steps to integrate Amazon Courier with your system:

> This document is intended for Amazon Sellers with a Seller Central Account. If you are an Amazon Shipping Central customer without a Seller Central Account, the information provided here may not apply to your specific situation. Please ensure you have the correct account type before proceeding.

1. **Access API Accounts**: **Navigate** to the left panel and hover your cursor over "API Accounts."
2. **Create a New Auth**: **Click** the plus icon to initiate the setup process under your preferred API Account.
3. **Select Amazon**: In the first row, **select** "Amazon" from the available options.
4. **Connect Amazon Account**: To connect with Amazon Courier, **click** "Courier Login."
5. **Amazon Login**: A new tab will open, presenting you with the Amazon login page. **Click** on "Log in with Amazon" to proceed. It will direct you to the Amazon login page, where you can enter your credentials to access the platform.
6. **Confirm Connection**: After successfully logging in to your Amazon account, you will be prompted to **confirm** the connection between Amazon Courier and your Voila account. Be sure to accept and continue with the integration.
7. **Finalise Setup**: Once the connection is established, you will be automatically redirected to the **Voila** interface. To complete the setup, **click** on "Save Changes."
8. **Generating a Login Link for Amazon: Generate** a link you can share with others to use their Amazon Auth.

Following these steps, you will successfully configure the Amazon Courier integration with your **Voila** account.
