

DHL eCommerce

Overview

This document provides a step-by-step guide to integrating DHL eCommerce with **Voila**. Follow these instructions to integrate DHL eCommerce into your system:

1. Begin by **navigating** to the left panel and hovering your cursor over "API Accounts."
2. **Click** the plus icon to initiate the setup process under your preferred API Account.
3. In the first row, **choose** "DHL eCommerce" from the list of available options.
4. The following fields are required for setting up DHL eCommerce integration:
 - **Company:** **Enter** any identifier you prefer.
 - **Testing:** This is a simple **yes or no** selection. If enabled, the information will not be transmitted to the courier through their API, making it suitable for testing.
 - **Pickup_Account_ID, Client_ID, Client_Secret, Distribution_Center, Returns_Company_Name, Returns_Address_1, Returns_Address_2, Returns_City, Returns_Country, Returns_Postcode, Returns_Country_ISO, Returns_Phone, Returns_Email:** **Obtain** these details through DHL eCommerce's platform or contact them directly to acquire this information.
 - **Notes:** Use this field to **enter** relevant information or notes regarding this courier. It will only be visible to you.
5. To complete the setup, **click** on "Save Changes."

By following these steps, you will successfully configure the DHL eCommerce integration with your **Voila** account.
