International Bridge USPS

Overview

This document provides a step-by-step guide to integrating International Bridge USPS with **Voila**. Follow these instructions to integrate International Bridge USPS into your system:

1. Begin by **navigating** to the left panel and hovering your cursor over "API Accounts."
2. **Click** the plus icon to initiate the setup process under your preferred API Account.
3. In the first row, **choose** "International Bridge USPS" from the list of available options.
4. The following fields are required for setting up International Bridge USPS integration:
   - **Company**: **Enter** any identifier you prefer.
   - **Testing**: This is a simple **yes or no** selection. If enabled, the information will not be transmitted to the courier through their API, making it suitable for testing.
   - **Username, Password**: You can **obtain** these details through International Bridge USPS's platform or contact them directly.
   - **Notes**: Use this field to **enter** relevant information or notes regarding this courier. It will only be visible to you.
5. To complete the setup, **click** on "Save Changes."

By following these steps, you will successfully configure the International Bridge USPS integration with your **Voila** account.

> **Caution:** You can opt out of sending dimensions to this courier. This action ensures that International Bridge USPS charges you based on actual weights and dimensions rather than submitted weights and dimensions.
