USPS

Overview

This document provides a step-by-step guide to integrating USPS with **Voila**. Follow these instructions to integrate USPS into your system:

1. Begin by **navigating** to the left panel and hovering your cursor over "API Accounts."
2. **Click** the plus icon to initiate the setup process under your preferred API Account.
3. In the first row, **choose** "USPS" from the list of available options.
4. The following fields are required for setting up USPS integration:
   - **Company**: Enter any identifier you prefer.
   - **Testing**: This is a simple yes or no selection. If enabled, the information will not be transmitted to the courier through their API, making it suitable for testing.
   - **Username, Password**: Obtain these details through USPS's platform or contact them directly to acquire this information.
   - **Notes**: Use this field to enter relevant information or notes regarding this courier. It will only be visible to you.
5. To complete the setup, **click** on "Save Changes."

By following these steps, you will successfully configure the USPS integration with your **Voila** account.
